

# IS YOUR OIL TANK IN SHAPE ?

For Our Customers with aboveground oil tanks, here's a quick checklist of items that can be easily observed by you, the homeowner. Should you notice anything unusual or different about the condition of your oil tank, remember, **look – don't touch**. It's best to **call our service department and let a professional take care of it**.

① Are the tank legs unstable or on an uneven foundation?

NO  YES

② Do you see rust, weeps, wet spots, or excessive dents on the tank's surface?

NO  YES

③ Are there any drips or signs of leakage around the oil filter or valves?

NO  YES

④ Do the oil lines run either under concrete or aboveground without being encased in a protective tubing?

NO  YES

⑤ Are there any threats of snow or ice falling on the oil tank or the filter?

NO  YES

⑥ Are there any signs of the tank's vent being clogged or blocked by ice or snow? (Screened vents are available to prevent insect nest problems.)

NO  YES

⑦ Is the overfill whistle obstructed, or silent when the tank is being filled? (It should whistle.)

NO  YES

⑧ Are there any signs of spills around the fill pipe?

NO  YES

⑨ Is the tank's gauge cracked, stuck, or frozen? Do you see oil or staining around it?

NO  YES

⑩ Is your tank more than 25 years old?

NO  YES

⑪ Is your outside tank a dark color? (It should be painted a light color to minimize corrosive condensation inside the tank.)

NO  YES

If any of your answers to this checklist are YES, please call our service department for a more detailed inspection and corrective measures...Don't wait, Call Today !!
